## AUFIRE'S GENERAL SAFETY WARNINGS

*AUFIRE is for use with video simulators  
and non-lethal training ammunition only!*

Never use live ammunition; involuntary trigger-finger contractions may occur.

Always follow basic firearms safety rules.

Only those who have read the instructions and safety manual should operate the AUFIRE system.

Never use on persons with known or suspected: heart conditions, pacemakers, who are pregnant or have any health conditions that make use of an electro-muscular stimulation device unsafe. Consult with your physician prior to use.

Always use safety gear, including without limitation full-face protection, body armor, and other safety gear recommended or required by your agency or association.

Always apply conductive skin-prep lotion to inner and outer forearms, biceps, and abdominals to prevent skin irritation from conductive pads.

Never turn sleeve inside-out while connected to the AUFIRE system.

Report any unsafe conditions or injury immediately to your supervisor and trainer.
