RE: Your submission dated February 15, 2021

**COMMODITY JURISDICTION DETERMINATION FOR: Accuracy Under Fire (AUFIRE) Resilience Training System, Model AUFV121**

Dear Mr. Nyokror:

The product described in your submission uses special purpose Electrical Muscle Stimulation (EMS or E-Stim) in conjunction with a remote-control unit to create an injury simulation system with the help of EMS to train officers to make better decisions when faced with disabling injuries.

A technical review of your commodity jurisdiction (CJ) request has been concluded by requisite agencies of the United States government. The findings of that technical review are:

The Department of State has determined that the **Accuracy Under Fire (AUFIRE) Resilience Training System, Model AUFV121 is not subject to its jurisdiction.** However, the item is subject to the Export Administration Regulations (EAR) administered by the Department of Commerce, Bureau of Industry and Security (BIS), which advises this item is classified as EAR99. Should you require information on how to satisfy the applicable regulatory requirements of the EAR, please contact the BIS Office of Exporter Services at (202) 482-4811.
